

PROFESSIONAL SUMMARY:

- Certified with 9+ years of experience in React Native and Android mobile application development.
- Have experience for taking responsibility for complete app or product in Module, upload and update app on Google play store and App Store.
- Well versed on working with Type Script, Redux, Context API and Hooks developing React Native application.
- Valuable experience in the entire software development life cycle including requirements gathering, design, coding, testing, debugging and maintenance.
- Experience in using React.JS, React Native, Redux, Babel+ES6, WebPack for Web Application development.
- Experience in using Fetch Api and Axios for building React native applications.
- Expertise in Social API Integrations like Facebook, Google plus, Instagram, Apple and Firebase Push Notification.
- Expertise in multiple payment gateway integrations like CC-Avenue Integration, Razor-pay, Stripe Payment, Braintree, Braintree Subscription and InAppPurchase.
- Well versed on working with Location API's (Google places, maps), Rest API's and many 3rd party libraries like White Pages API, Sendbird Chat, Twilio Chat, Firebase Chat.
- Experience in implementing Multi-Language in react native app and Deep linking.
- Experience in working with GraphQL queries and use Apollo GraphQL library.
- Reviewed and improved code quality through rigorous code reviews, establishing coding standards, and enforcing best practices to ensure robust and maintainable codebases.
- Proficient in using Jest and React Native Testing Library to deliver robust and reliable applications.
- Experience in Salesforce React Native Mobile SDK.
- Experience in implementing Input/Form validation using Formik and Yup libraries in react native.
- Experience in offline Databases like Realm and Sqlite in React Native.
- Excellent knowledge in core concepts like Object Oriented Programming, Memory Management, Persistent Data.
- Well versed in user-friendly design, performance improvement, documenting code, refactoring, continuous integration and deployment, and unit testing.
- Known for excellent troubleshooting skills, able to analyze code and engineer well-researched, cost- effective, and responsive solutions.
- Expertise in complete Software Life Cycle Development experience and Agile experience in fast paced environments.
- Implemented ES6 module syntax to create modular, reusable code components, enhancing code organization and maintainability.
- Strong knowledge in all phases of the Software Development Life Cycle (SDLC) process, which includes requirement analysis, designing, implementing, debugging, testing, fixing and maintaining applications.
- Created and customized views, table views, stack Views tab bars and navigation bars which are some basic functionalities in a React Native application.
- Integrated AWS services to manage user authentication, file storage, and real-time data synchronization for React Native applications.
- Great communication skills both verbal and written, with experience working with a variety of team makeups including local and international teams.

TECHNICAL SKILLS:

Programming Skills: Objective-C, Java script, Type script, Java, React Native, Redux, React JS, Hooks.
Database: SQLite, Realm
IDE/SDK's: XCODE, Android Studio, Visual Studio

Operating Systems: Mac OS Catalina, Windows, Linux.
Tools: Notepad++, MS Visio, Visual Studio, Microsoft Office Suite.
App Domains: Social App, Real-estate app, Tour & Travel App, E-Commerce App, E- learning app, Event Management App

PROFESSIONAL EXPERIENCE

HCL Technologies (Western Union)

Apr 2025 to Present

Technical Lead - React Native

Responsibilities:

- Leading the React Native mobile development team for the Western Union digital payments platform, driving architecture decisions and technical strategy.
- Architecting and developing cross-platform mobile applications using React Native, TypeScript, Redux, and modern state management patterns for high-traffic financial services.
- Mentoring and conducting code reviews for a team of developers, establishing coding standards and best practices to ensure maintainable, high-quality codebases.
- Implementing secure payment workflows, biometric authentication, and compliance-driven features for international money transfer services.
- Collaborating with cross-functional teams including backend engineers, UX designers, QA, and product managers in an Agile Scrum environment.
- Optimizing application performance, reducing load times, and improving app stability through profiling, lazy loading, and efficient state management.
- Integrating RESTful APIs and third-party SDKs for real-time transaction tracking, push notifications, and analytics dashboards.
- Writing comprehensive unit tests and integration tests using Jest and React Native Testing Library to ensure reliability across iOS and Android platforms.

Project: Send2Corrections

Developed 1 React Native and React web application for Western Union’s Send2Corrections platform, enabling users to send money to correctional facilities instantly with secure payment processing.

- Built cross-platform mobile app (iOS & Android) using React Native with TypeScript, Redux for state management, and secure payment workflows for correctional facility transactions.
- Developed the React.js web application for the same platform, ensuring feature parity and consistent user experience across mobile and web.
- Published and maintained the app on App Store and Google Play Store.

Environment: React Native, React.js, TypeScript, Redux, REST APIs, Jest, React Native Testing Library, Firebase, Xcode, Android Studio, Jira, Git, Agile/Scrum, CI/CD.

Freelance/Contract - USA

Aug 2024 to Mar 2025

Sr. React Native Developer

Responsibilities:

- Developed and delivered cross-platform React Native mobile applications for US-based clients on contract, working independently from requirements gathering through deployment.
- Built performant, scalable mobile applications using React Native, TypeScript, Redux Toolkit, and React Navigation for seamless user experiences.
- Integrated RESTful APIs, Firebase services, third-party payment gateways, and social authentication to deliver full-featured production applications.
- Collaborated directly with US-based stakeholders and product owners, managing project timelines, sprint planning, and delivery milestones.
- Published and maintained applications on both the App Store and Google Play Store, managing certificates, provisioning profiles, and release cycles.

Environment: React Native, TypeScript, Redux Toolkit, React Navigation, Firebase, REST APIs, Xcode, Android Studio, Git, App Store, Google Play Store.

STRIVE MINDZ - Freelancing

Aug 2023 to Aug 2024

Sr. React Native Developer

Responsibilities:

- Developed and maintained cross-platform mobile applications for iOS and Android using React Native, enhancing user experience and performance.
- Built a app with complex data management with Redux and provide pixel perfect design using Material UI.
- Built reusable and custom hooks components to utilize them throughout the project and save time.
- Used Fetch/Axios to make API calls in React application and well versed in React Navigation.
- Integrated various third-party packages in React application like Firebase features (chat, push Notification, Analytics, Database), sendbird chat, White Pages Api.
- Implemented Google Maps services in mobile applications using the react-native-maps library, enabling users to visualize locations and navigate routes seamlessly.
- Developed custom markers and overlays on the map to enhance user interaction, providing tailored information for specific locations.
- Utilized geolocation APIs to display the user's current location on the map, enhancing user experience through real-time navigation and tracking.
- Utilized modern JavaScript features such as arrow functions, promises, async/await, and destructuring to write efficient and maintainable code.

Developed 1 React Native App – short summaries of App's below:

- Ponde App: Event registration and booking App, to be used in US market. App URL link [here](#)

Wipro

Feb 2022 to June 2023

Sr. React Native Developer/Mobile Application Developer

Responsibilities:

- Used mobile development in Salesforce React Native SDK.
- Reviewed and improved code quality through rigorous code reviews, establishing coding standards, and enforcing best practices to ensure robust and maintainable codebases.
- Collaborated with a team and business analyst to define, design, and ship new features.
- Wrote test cases. Performed Unit testing and debugging for mobile application.
- Gathered requirements for implementing new feature in application from client, designed and implemented the feature in application in a timely manner. Presented Demo of all implemented features to the business team.
- Implemented App-Center crash analytics and logs in app which aims to help developers monitor the status, user's behavior of the app and helping root cause analysis for bugs.
- Resolved complicated technical design challenges and created technical specifications and plans.
- Played a key role in feature implementation and enhancement, code refactoring, defect fixing and Production bug fixing.
- Worked in using React native functional components, Hooks, Navigation and Redux concepts.
- Worked on Agile Scrum methodology and delivered accepted functionality in each sprint.
- Implemented stable React Native Functional components and designing UI.
- Worked on REST API requests and Offline Database SQLite.
- Used tools like Git, JIRA, Xcode, Figma and code review processes.
- Employed rest and spread operators to handle function arguments and array manipulation, promoting a functional programming approach.
- Collaborated with UI/UX designers to implement interactive elements and dynamic content, leveraging JavaScript for seamless user experiences.
- Implemented integration tests and end-to-end tests to ensure consistent user experiences across multiple devices.

- Interacted with Testing Team, Scrum master's and Business Analysts for fixing of Issues.
- Participated in agile daily scrum, Planning meeting, Backlog grooming, Sprint Planning and sprint retrospective.

Worked in 1 React Native Salesforce App – short summaries of App's below

- DWM National Grid App: The Digitalizing Work Management (DWM) app used by the SAP Work Manager for its field force to receive, view and complete planned maintenance and inspection works on assets. DWM App, to be used in UK markets and made for iPad only. This app is created using Salesforce React Native mobile SDK.

Environment: React Native, JSON, Windows, Salesforce, ES6 JavaScript, TypeScript, React with Redux, SQLite, Jira, Google Maps, OAuth, Firebase, Crash analytics, Figma, Xcode, Android.

Dotsquare, India

Sept 2019 to Nov 2021

React Native Developer/Mobile Application Developer

Responsibilities:

- Designed and developed more than 6 application from scratch in React Native for iOS and Android platforms.
- Collaborated with a team and business analyst to define, design, and ship new app.
- Most of app are single handled by me.
- Worked on Agile Scrum methodology and delivered accepted functionality in each sprint.
- Implemented app using functional and class components and Hooks.
- Implemented Redux and Offline Database like Realms and SQLite.
- Implemented the location based services GPS, Bluetooth.
- Have done POC and used iOS and Android native bridging with React Native.
- Integrated GraphQL with React Native applications using Apollo Client to streamline data fetching and management, improving application performance and reducing over-fetching of data.
- Interviewing, hiring, and providing career development to full time.
- Developed authentication procedure to both Firebase and Rest API
- Developed multi language app using localization and library (React Native).
- Developed and maintained React Native applications with a focus on test coverage using React Native Testing/Jest Library.
- Experience in web application programs covering front-end/UI/UX using web technologies like HTML4/5, XHTML, CSS2/3, JAVASCRIPT, JSON, XML and AJAX .
- Developed this Mobile App using the Typescript.
- Published mobile app with XCode and Android Studio for IOS and Android platform.
- Used ES6 syntax and upgrading the react native apps regularly to make the stable version of apps.
- Configure Gradle Script for Android Studio.
- Configure iOS certificate and XCode keychain and build setting.
- Performed Code review and involved in manual testing, prepared Unit Test Cases and Unit test plan and performed Unit testing and writing the integration test whenever required in the application flow.
- Researched and suggested new mobile products, applications, and protocols and stay up-to-date with new technology trends integrating applications with various Database.
- Implemented React Native Template for all the Juniors and also took React Native classes.
- Implemented Input Validation using Formik and Yup Libraries in React Native.
- Supported faster image loading by caching using React Native Fast Image.
- Implemented push notifications utilizing Firebase.
- Created the Responsive UI and UX for different types of Tablets and iPad and make the App compatible on every Screen.
- Developed and deployed React Native applications using AWS Amplify, simplifying backend integration for authentication, data storage, and APIs.
- Worked with ES6 collections (Map, Set) to efficiently manage unique values and key-value pairs, optimizing performance in data handling.
- Implemented the Navigation feature like Drawer, Tabbar, stack in app.
- Implemented multiple payment gateway integrations like CC-Avenue Integration, Razor-pay, Stripe Payment, Braintree, Braintree Subscription and InAppPurchase.
- Participate in daily SCRUM meetings to keep track of the on-going project status and issues.

Developed 10 React Native App – short summaries of App's below:

- Consent2Go App: Student care and Event management app. Available in US market - [Consent2Go](#)
- Consent2Go App: - Available in US market- [Consent2GoForStaff](#)
- ComicEgg App: E-Commerce app to sell/buy comics. App URL link [here](#)
- 19thHole: 19thHole is a social networking app for golf players with functionality to match other players based on location, profession, hobbies, interests and handicap to be used in UK. App URL link [here](#)
- Flexitin : FLEXTin is easy to use, super simple, safe, and ready to go app that allows site access by simply scanning a QR code. App URL link [here](#)
- CRDC App: Hotel booking App, to be used in US markets.
- Food Finder: Restaurant food delivery App.
- Fasted+: Easy to use intermittent fasting tracker for all experience levels. App URL link [here](#)
- Epizite App: online course app where user can purchase or watch courses.
- Tenancy App : This application is designed to streamline the leasing process and provide an online portal that assists from the very start (inspections) to the very end (when a tenant moves in), to be used in Australia market. App URL link [here](#)

Environment: HTML, Java, XML, React Native, JSON, Eclipse, CSS, Windows, Linux, ES6 JavaScript, TypeScript, React with Redux, SQLite, Realm, Google Maps, Social Login, OAuth, Firebase.

3Edge Technologies,India

Jan 2016 to July 2019

React Native Developer

Responsibilities:

- Designed and developed an entire application from scratch in React Native and also worked on android native applications.
- Upgrade code with latest version in react native, improve maintainability and facilitate unit testing.
- Cooperated with UI Designers, QA, Backend and PO. Also, applied pair programming.
- Handled code review and bug fixes.
- Responsible for design and development of various components such as tab bars, a map view, image picker, date picker, push notifications, sign-in/out features, profile management, and navigation using react-native.
- Implementation of Google ads in android and react native app.
- For loading images worked with Picasso, Glide, Universal Image loader etc in react native app.
- Made the Restful Web Service Calls and parsing the JSON responses back from the web servers according to the application requirement using Axios, React Redux.
- Produced integration of third-party services and APIs for added application functionality, improving user experience and application utility.
- Used Crashlytics while testing the application to verify the proper free-flow working of the application.
- Designed user interface using various Custom Layouts, buttons, dialog boxes, alert boxes and edit boxes in React Native.
- Made all API calls done through retrofit including setting up a mock API service for unit testing.

Developed 7 React Native App – short summaries of App's below:

- Magic PMC: Construction management App.
- Staffd App: Company staff work timings availability management for job notification, to be used in US markets.
- CRM App: Lead generation App, used by BNI Groups
- SendSay App: Design and deliver cards for wishes like birthday, to be used in US markets
- Ground therapy: Offline app where user can see their site product and video pages with ability to download as PDF.
- Ground therapy learning: Join the movement app to create awareness about earth's energy benefits
- MPS 94 Alumni: App to connect all classmates.

Environment: React Native, JSON, HTML, JavaScript, Java, XML, GPS, Google Maps API V2, REST, DDMS, Retrofit, XML, SQLite, Realm, Windows, Linux, Android.

EDUCATION

Master of Computer Application (MCA)

BANASTHALI VIDYAPITH, JAIPUR

JUNE 2013 TO MAY 2016

Bachelor of Computer Application (BCA)

IIS UNIVERSITY, JAIPUR

JULY 2010 to May 2013
